Kozhikode, Kerala

EDUCATION

Bachelor of Technology, Information Technology (7.5 CGPA)

Manipal University Jaipur

2022 - 2026 Rajasthan

Class XII (88%)

Bharatiya Vidya Bhavan, Chevayur

2019 - 2021 Calicut

PROJECTS

GPU-Accelerated Spatial Awareness Assistant

Tech Stack: Python, PyTorch, YOLOv8, Intel MiDaS, OpenCV, CUDA

- Fused dual-YOLOv8 object detection with Intel MiDaS monocular depth estimation to construct real-time 3D spatial awareness maps.
- Leveraged CUDA GPU acceleration and OpenCV to trigger low-latency, non-blocking audio cues for distance obstacle warnings.

Produce Freshness Detection System

Tech Stack: Python, Django, TensorFlow/Keras, VGG16, OpenCV

- Fine-tuned a VGG16 CNN architecture via transfer learning to classify fruit and vegetable freshness, achieving 94.62% accuracy.
- Built a full-stack Django web application enabling real-time image upload, automated inferencing, and quality assessment.

AI Medical Diagnostic Chatbot

Tech Stack: Python, Flask, Scikit-Learn (MultinomialNB), PyTest, Botpress

- Trained a Naive Bayes model on 4,900+ medical entries across 800+ diseases using MultiLabelBinarizer for symptom encoding.
- Built a RESTful Flask API integrated with PyTest unit testing to handle real-time disease prediction and out-of-vocabulary inputs.

SKILLS

Programming Languages:

Python C++ JavaScript HTML SQL CSS

Frameworks & Libraries:

Flask Django PyTest Scikit-Learn OpenCV React.js Node.js

Database:

MySQL AWS

Tools:

VS Code Google Colab Jupyter Notebook

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations, Cloud Security Foundations
- Oracle Academy – Oracle Cloud Infrastructure Foundations
- Udemy – Python: Big data Analytics and Data Science, Cloud Security Fundamentals: Protect Data, Apps and Infrastructure
- Coursera – Blockchain: Foundations and Use Cases, Blockchain and Cryptocurrency
